TO ASSEMBLE:

1. Remove all packing contents from the carton(s) carefully. Please be sure you have all parts indicated before you begin assembly.
2. Remove the mounting plate(a) from the canopy (B) by turning collar loop (C) in a counterclockwise direction.
3. Carefully inspect the fixture wires. The neutral fixture wire has very fine ridge molded into its plastic covering. The hot fixture wire has a smooth covering. The bare silver wire is the grounded wire.
4. Attach the ground wire from the fixture to the ground junction box wire from the outlet (usually green or bare wire). Fasten each together with a plastic wire connector (K) and wrap the connection with electrical tape. If your outlet box does not have a ground wire, insert the green ground screw into the mounting plate (A) facing down, and wrap the fixture's bare ground wire around the ground screw. It is imperative that the outlet box in your home be properly grounded.
5. Connect the neutral fixture wire to the neutral junction box wire (usually white). Fasten each together with a wire connector (K) and wrap the connection with electrical tape. Be sure no strands are exposed.
6. Connect the hot fixture wire to the hot junction box wire (usually black). Fasten each together with a plastic wire connector (K) and wrap the connection with electrical tape. Be sure no wire strands are exposed. Do not reverse the hot and neutral connections or safety will be compromised.
7. Gently tuck the wire connections neatly into the ceiling junction box.
8. Attach the mounting plate (A) with nipple to the ceiling outlet box using the enclosed mounting screws (J) and tighten screws with a screwdriver.
9. Push collar loop (C) in canopy (B) and thread onto nipple in mounting plate (A) by turning in a clockwise.
