

CAMELLA SMALL FLUSH MOUNT

DFC35

H: 8 IN

Dia: 18 IN

Arranged in a sculptural sunburst formation, the Camella Small Flush Mount features a radiating disc of ivory ricestone composite with softly carved, petal-like curves. Light washes across the textured surface, creating dimension and a warm halo around the antique brass center. Finished with a signature spherical finial, this flush mount brings artisanal elegance and quiet drama overhead.
