

MAXTON CHANDELIER

DS112
Smoke Ombre
Seeded Glass
H: 24.5 IN
Dia: 24.5 IN

Twenty-seven cylindrical glass tubes are individually hand-blown into a mold, creating subtle variations in the interior and exterior form of this unique chandelier. These nuanced irregularities create slight shifts in the suspension and enhance the layered interplay of opacity and translucence within the smoke ombré finish. Anchored from a bronze-plated iron armature, this contemporary chandelier delivers sculptural statement lighting for luxury interiors. Each glass tube is topped with an acrylic disc that limits dust accumulation within the piece. Certified for damp locations and intended for interior use.
