

GINN TABLE LAMP

PTC33-103  
 Pebble Reactive,  
 Ceramic  
 H: 30 IN  
 Dia: 20.0 IN

Glazed in an updated finish, the Ginn's pebble reactive glaze results in a one-of-a-kind fixture. A brown irregular drip line highlights the irregular urn shape and is even more impactful when illuminated. This ceramic vessel is finished in an off-white linen drum shade and antique brass hardware with a matching ceramic finial. Clear silver cord. Finish will vary.
